*JobOps integration with Sage e-Business Manager, an optional module for Sage MAS 90 and Sage MAS 200 lets users manage jobs with more flexibility over the Internet.*

JobOps Integration with the Sage e-Business Manager module lets you bring the power of internet to get better access to critical job-related data for customers, employees and partners. The integration is simple to use and transparent to users, letting you leverage the Internet to get jobs done on-time and more profitably.

### Three powerful applets are provided to track, cost and configure jobs.

#### .Configurator

Allows the JobOps Configurator to be used over the Internet by your sales staff or customers. Here's where they can use the Sage e-Business Manager shopping cart technology, configure custom products, quote them and even submit orders all through your secure website.

#### .JobTracker

Helps eliminate calls from customers wanting to know the status of their jobs by letting them access this information online through your secured website. They will be able to see the completion status of all the steps related to their job, thereby freeing up your valuable support resources.

#### .Labor

Internet access for your employees to enter time directly to jobs using the JobOps Time Tracker Module makes data collection more efficient. This option is ideal for field service personnel who do not have direct access to Sage MAS 90 or 200.

Take advantage of this Sage e-Business Manager integration with JobOps to extend the usability of your software and drive total job profitability. You'll quickly see the return on your investment in JobOps and your Sage MAS 90 and 200 systems.

JobOps is a suite of Job Management modules for Sage MAS 90 and Sage MAS 200 ERP. JobOps is suited for small and mid-sized companies (\$7-50 million), in the manufacturing, installation and service/field repair areas.

*Introduce Internet access to JobOps Job Management and see how customers, employees and partners can tap into its power.*

- **Shopping Cart**
- **Fully Secure**
- **Job Status**
- **Job Costing**
- **Field Labor**
- **Shop Floor Labor**
- **Leverage Concurrent Licenses**

The **.Order** applet provided with Sage Software's e-Business Manager and the JobOps Product Configurator **.Configurator** applet lets customers use the shopping cart technology and configure their custom job options online for current pricing and ordering.

Access to the Internet-based applications of the Sage integrated e-Business Manager and JobOps integrated modules is secure and available to only those customers or personnel that have permission.

Detailed job status including work completed and scheduled is available to your customers so that they can have confidence that their jobs are being handled in the most efficient manner and delivered on time.

Management can review current job costing from remote locations to stay on top of job profitability while traveling or working from home.

Installation crews and field service technicians can report on labor from the field directly to the job that facilitates faster and more accurate labor costing and billing.

Shop floor data collection is made easier using Internet access to labor reporting without impacting internal networking resources.

Using the integrated Sage e-Business Manager with JobOps uses a single license on the Sage MAS 90 or Sage MAS 200 system, but allows multiple users access to the system through a single port.
