

Sage Software Named 2008 CRN Channel Champion In SMB Software Suites

We are very excited to share that Sage Software has won the 2008 CRN Channel Champion Award in the category of SMB Software Suites -- beating out Oracle and Microsoft! This recognition is very significant for us because the results are based upon the voice of the partner community.

The CRN Channel Champions study measures overall Solution Provider perceptions of vendor products and services. The survey is the largest and broadest-based technology integrator market study in the industry.

Sage Software was evaluated against Microsoft and Oracle, and was ranked #1 in the following categories:

- Configurability or Customization Tools
- Price for Performance
- Post-sales Support
- Pre-sales Support
- Relevance of Channel Program
- Efforts To Manage Channel Conflict
- ROI of Vendor Relationship
- Services Attach Rate

Sage Software achieved the highest overall Program & Support Satisfaction, and Financial Satisfaction ratings, which garnered the overall SMB Software Suites Channel Champion crown for the company!

As we endeavor to innovate and strengthen what we deliver to our partners, we thank you for your continued partnership with Sage Software. For those of you who participated in the study, we appreciate your validation and will continue to work hard to win the support of our channel in the future. This award truly exemplifies the mutual success of Sage Software and our business partners.
